### ***Drawings***

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

The layer structure including the rubbing directions and preferred direction of the molecular alignment in relation to the layer normal should be shown.

### ***Response to Arguments***

Applicant's response to the objection to the drawing was correct, as there should not have been an objection to the drawings, but rather a requirement to furnish drawings.

### ***Allowable Subject Matter***

Claims 1-15 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: None of the prior art taught or suggested a device as claimed where the normal to the smectic layers was at a 5 degree angle to the preferred direction in the nematic phase.
